PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience at Jio Platforms Limited as an Associate Software QA Engineer, contributing to production-grade web applications using the MERN stack. Proficient in JavaScript, React.js, Node.js, Express.js, MongoDB, REST APIs, and Redux, with hands-on experience building end-to-end features across frontend and backend. Strong focus on writing clean, maintainable code, developing scalable systems, and improving user experience.

TECHNICAL SKILLS

Programming Languages: JavaScript.
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control.
Frontend: React.js, React Native, Redux Toolkit.
Databases: MongoDB, SQL.

PROFESSIONAL EXPERIENCE

Jio Platforms Limited *Jan 2024 – Present*
Graduate Engineer Trainee – Associate Software QA (Frontend Focused)

- Worked on the MyJio application as a frontend developer, building and maintaining features using React Native.
- Performed and exploratory testing of React-based web applications, validating UI/UX, responsiveness, and cross-platform compatibility to ensure a consistent user experience.
- Designed and executed test cases for frontend features, working closely with developers and product teams to identify, track, and resolve defects early in the release cycle.
- Verified API integrations and data flow between frontend and backend systems using RESTful services, ensuring accuracy and reliability of user-facing features.
- Contributed to improving overall product quality by maintaining test documentation, participating in sprint reviews, and supporting regression testing for new releases.

INTERNSHIPS

Infoxeron Technologies —Frontend Intern *Jan 2022 –Apr 2022*

- Developed frontend applications, and code maintenance.

PROJECTS

Movie Database App (CodeLink) *React.js, JavaScript, Redux*
A Project focusing primarily on Frontend development, handling data from API calls.

Contact Manager *Express.js, MongoDB, Node.js*
Built a contact manager platform for managing contact, handling CRUD methods. Creating API's to handle all the requests.

Bank App (CodeLink) *React.js, Express, Node.js, MongoDB*
Built a role-based banking web application using the MERN stack, enabling users to manage accounts, perform transactions, and access features based on roles such as manager and account holder.

Food Recipe App *React.js, Express, Node.js, MongoDB*
Built a food Recipe project where any user can create and store recipes. Performed user authentication and CRUD applications.

EDUCATION

Bachelor of Engineering – Computer Engineering *CGPA: 8.4 / 10*
Sinhgad Institute of Technology and Science, Narhe — *2023*

CERTIFICATIONS & ACHIEVEMENTS

Node.js & MongoDB: Developing Back-end Database Applications
Developing Back-End Apps with Node.js and Express
Programming with JavaScript
Advanced React
